

# Golf Course Being Completed at Club; House Plans Made

BY C. ARMOR GUY

Two miles northeast of the intersection of Main street and Peters avenue are the 120 acres which make up the Norman country club. This tract includes three lakes which are stocked with game fish, a polo field and a clay pigeon ring. A golf course is nearing completion and plans for a comfortable club house are well under way.

This property although purchased by the club some time ago, has been in possession of members only since January 1 and midsummer will show great improvements over the present accommodations, according to Dr. L. A. Turley, club president.
