

Rapid Progress Is Made In Twin Hills Links Construction

Five Fairways Cleared And
Planted; More Than 100
Members Signed.

Work on the Twin Hills Golf and Country club has progressed so rapidly that five fairways have been cleared and planted and the remaining fairways will be ready for planting within a short time.

For the past two weeks two crews have been at work with tractors, clearing the brush and trees from the grounds.

Secretary Robert A. Conliff is enthusiastic over the progress made and expressed the opinion that if the weather holds out the course will be far ahead of the schedule planned by the last of the summer.

A. E. Mads, chairman of the board of directors, reported Saturday night that more than a hundred members had already been signed. He expressed himself as highly satisfied with results on the course and in the membership soliciting.
