

Improvements Being Made on Golf Course By Local Golf Sports

Relocating some of the tees and greens and measuring the distance between them was the work performed on the golf course at the country club last Wednesday by Julian C. Monnet, E. Berrigan, M. F. Fischer, R. W. Hutto and L. A. Turley, according to the announcement of Mr. Turley Wednesday night.

This work was done preparatory to building up and leveling off the course. When the work is completed, local golfers think they will have one of the best courses in this section. Many lovers of this sport are taking daily tryouts, and some good players are in the making.
