

The proposed plan provides for complete country club facilities at the Huntington Club, in addition to a well-equipped beach. The east golf course at the club will be continued, providing 27 holes, and the first, second, third, 16th, 17th and 18th holes of the west course will be rearranged to provide an extra nine holes. These will be so arranged that they may be played in any combination of nine, thus having in effect the value of 36 holes.
